

Chairman's Sale 2025 | How to Read Your Analysis

What This Report Is

Each broodmare in the Chairman's Sale has been analysed using advanced pedigree models built by G1 Goldmine and Stallion Match. The report simulates the top 10 hypothetical matings with commercial stallions in Australia and New Zealand. It identifies high-potential crosses using stakes performance data, proven nicks, and complete pedigree evaluation.

This analysis is designed to help breeders and buyers make more informed, data-backed decisions. [Read how to understand the reports.](#)

Why It Matters

The report isn't just pedigree theory — it's built on a machine-learning engine that compares the mare's pedigree against millions of global race results. It flags combinations that outperform expectations and highlights matings that resemble known stakes winners. The aim is simple: reduce risk and identify upside.

Key Indicators Explained

- **Perfect Match:** Mating is 8x more likely to produce a stakes winner
- **20/20 Match:** Mating is 2.1x more likely to produce a stakes winner
- **Impact Profile:** Highlights key crosses in the pedigree that have historically outperformed or underperformed expectations
- **Similarity Score:** Shows how closely the hypothetical mating resembles known stakes winners -replication of success is key

Stallion Criteria

Reports include all stallions standing in Victoria, New South Wales, and New Zealand with a service fee of \$20,000 or more. Where available, 2025 service fees are shown in brackets next to the stallion name.

A Trusted Collaboration

This analysis is a partnership between Inglis, Stallion Match and G1 Goldmine — combining market-leading sale experience with the most advanced pedigree analysis tools available in the industry.
