Veterinary Report – Breeding Soundness Certificate

Horse: Tuskar Brook
4yo brown mare

Microchip: 985100012044549

Location: Pat Carey Racing Stables, Mornington, VIC

Date: 15th June 2019

Tuskar Brook was examined today to determine suitability for use as a broodmare.

Manual palpation per rectum of cervix, uterus and both ovaries (left and right) revealed no clinically significant findings. The cervix and vagina were visualised via speculum and were found to be within normal limits.

Examination of vulva and udder revealed no clinically significant findings.

Based on the findings outlined above this mare is believed to be suitable for purpose of breeding at this time.

Dr Eoin Kelly MVB MRCVS
