1ST April 2020

VETERINARY REPORT FOR LOT 470 WRITTEN TYCOON/GOLD ANTHEM '18'

Signalment: 1-Year-Old Chestnut Thoroughbred Filly - 985100012150761

Stud: Lime Country

On the 30th March 2020, 'Gold Anthem '18' underwent a limited clinical examination at Lime Country. The horse was examined in the box and at rest and at the walk. The examination consisted of the following:

- Assessment of eyes menace and illumination- within normal limits
- Assessment of external genitalia- normal vulva and udder
- Assessment of ventral abdomen- no evidence of previous abdominal surgery
- Assessment at the walk and feet- no evidence of lameness or neurologic deficits
- Auscultation of chest and heart- no evidence of pathologic murmur and normal lung sounds
- Palpation of both jugular veins- both patent
- Rostral oral cavity – no parrot mouth

7th April 2020

VETERINARY REPORT FOR LOT 470 'WRITTEN TYCOON/GOLD ANTHEM '18'

Signalment: 1-Year-Old Chestnut Thoroughbred Filly- 985100012150761

Stud: Lime Country

On the 7th of April 2020, just prior to the commencement of the Inglis Easter Yearling sale 'Gold Anthem '18' underwent a limited brief visual examination at Lime Country.

The horse was examined in the box and at rest and at the walk and trot. The examination consisted of the following:

- Assessment at the walk - no evidence of lameness or neurologic deficits
- Assessment at the trot – no evidence of lameness
- Assessment of limbs- The horse has multiple contusions to both forelimbs:
 - Left fore has moderate dorsal knee soft tissue swelling that is generalised oedema. There is no obvious pain on firm flexion of the knee.
 - Right fore has multiple partial thickness abrasions over the radius and a small full thickness skin wound (5mm) and mild swelling over the mid lateral cannon bone which is not painful on firm palpation but has some mild drainage and appears at risk of developing an infection.

The horse has been started on a course of antibiotics (Penicillin) and anti-inflammatories.

See previous clinical examination report (30th March 2020) for more detailed clinical findings.

Please call if you have any queries regarding this report.
