Lot 445 - Fine Mist_Capitalist '18 VETERINARY REPORT Tuesday, March 31, 2020

Microchip No: 985100012151988

NS: N over Bar

OS: 34 over 8

This bay filly was presented to me at Sledmere Stud on 24.03.20. An examination was requested by stud management due to concerns that veterinarians may have difficulty attending the horse at the upcoming 2020 Australian Easter Yearling Sale due to Coronavirus travel restrictions.

The height was measured at 15.3 hands high.

The eyes and eyelids were examined with a bright light and no abnormalities were detected (Ophthalmoscopy was not performed).

The horse did not have a parrot mouth.

The heart was auscultated, and no murmurs or arrhythmias were detected.

The feet appeared to be symmetrical and within normal limits (No club feet).

There was no detectable joint swelling in the limbs.

The horse was sound at the trot (No flexion tests).

Yours sincerely,

Rowan B Sedgwick BVSc (Hon) MANZCVS
AVA No: 2177 VPB No: N5770

Please ensure that this report is forwarded to the horse's owner and the person responsible for the future care of the horse, as well as to the insurer, if applicable.
