Lot 286 - Winter In Seattle_Extreme Choice '18 VETERINARY REPORT Wednesday, March 25, 2020

Microchip No: 985100012157467

NS: W inside D conjoined

OS: 3 over 8

This bay filly was presented to me at Willow Park on 23.03.20. An examination was requested by stud management due to concerns that veterinarians may have difficulty attending the horse at the upcoming 2020 Australian Easter Yearling Sale due to Coronavirus travel restrictions.

The eyes and eyelids were examined with a bright light and no abnormalities were detected. Ophthalmoscopy was not performed.

The heart was auscultated, and no murmurs or arrhythmias were detected.

The horse was sound at the trot.

An upper respiratory laryngoscopic evaluation was performed and no conditions listed under Section 13.2(d) were detected.

She has a healing injury on the medial aspect of her left hind cannon. The injury occurred in January 2020 and is a cosmetic blemish which will not affect her athletic soundness.

Yours sincerely,

Rowan B Sedgwick BVSc (Hon) MANZCVS

AVA No: 2177 VPB No: N5770

Please ensure that this report is forwarded to the horse's owner and the person responsible for the future care of the horse, as well as to the insurer, if applicable.
